anastaciapenagalicia@gmail.com | <https://github.com/apega-tech>

PROFESSIONAL SUMMARY

Aspiring Software Engineer with a full-stack foundation in **HTML, CSS, Python, Java, and SQL**, developed through an accelerated Computer Science degree and rigorous technical training. Proficient in **object-oriented programming, data structures, algorithms, and Git-based version control**, with a strong ability to solve complex problems through detail-driven analysis. Eager to contribute to full-stack projects while leveraging prior experience in operational compliance and team leadership.

EDUCATION

Western Governors University (WGU)

Millcreek, UT

Accelerated Computer Science Bachelor's and Master's Degree

Graduation Day: August 2027

- **Relevant Coursework:** Data Structures and Algorithms, Software Engineering, Computer Architecture, Advanced Database Management.

WORK EXPERIENCE

DataAnnotation Tech

Remote

AI Data Trainer

June 2026 - Present

- **Evaluating and fine-tuning AI model responses for accuracy**, coding logic, and natural-language instruction, adhering to strict quality and style guidelines.
- **Writing complex prompts and debugging** generated code snippets to improve model performance across multiple programming languages, including Python and SQL.
- **Analyzing dataset patterns to identify** and correct model hallucinations, contributing to the development of safer, more reliable AI interactions.

Food Garden Market

Brooklyn, NY

Supervisor

December 2022 - June 2026

- **Modeled data points for floor inventory patterns** and structured replenishment workflows to optimize supply chain cycles, achieving zero stockouts during peak operational hours.
- **Enforced standard operating procedures (SOPs)** across a team of 50+ employees, using operational metrics to maintain efficiency benchmarks.
- **Optimized operational efficiency** by implementing data-driven scheduling, resulting in a 15% reduction in labor costs during non-peak hours.

PROJECTS

Inventory & Task Tracker

View all projects on GitHub

Python, Flask, SQLite, CSS

July 2026

- **Designed and deployed a full-stack CRUD application** to streamline floor-inventory workflows, effectively replacing manual tracking systems.
- **Implemented automated reorder flagging logic**, improving stock management efficiency and significantly reducing inventory discrepancies.
- **Architected a secure, lightweight database structure** using SQLite to maintain operational data integrity and support consistent stock replenishment.

SKILLS & INTERESTS

Languages: Python | Java | SQL | HTML | CSS

Core: Relational Databases | OOP | Data Structures & Algorithms | Systems Design

Languages: Spanish (Native) | English (Fluent)

Interests: Systems Architecture & Optimization | Technical Documentation & Open Source | UI/UX Prototyping | Maker Culture & Hardware Integration
